

Iteration 4

Feature requests:

indicator
of app
currently
running

Stories:

**Settings
Page -
White list**

8

**Statistics page
- usage
summary
table**

8

**TimeTracker -
Idle timeout**

4

**Whitelist
page
sorted by
most used**

4

make html index file
that changes
displayed content to
show the different
windows.

Optional:

(side-quest)
Statistics page -
Graphical
representation

8

**Track all
windows (not
just the
focused)**

16

Iteration 5

Feature requests:

Stories:

Optional:

To-Do:

Call SchemaBuilder's buildUp function somewhere upon launching the program

Verify:

TimeTracker - Idle timeout 4

Statistics

idea:

Example of Statistics Page:

App Name	Usage Time	Last Used.	Usage Over Time
Spotify	10 Minutes.	3 hrs ago.	spark line goes here
Chrome (currently running)	4.6 hrs.	4 minutes ago	spark line goes here
WebStorm (currently running	1 day 2 hrs	2 days ago	spark line goes here
PhotoShop	3 days 5 hrs	16 minutes ago	spark line goes here

**Create
installer**

(electron
forge)

**On boarding
process
(whitelist/
apps tracked
and
permissions)**

Build 3 Onload

L7 macOS, & Windows,

L7 Show the user how to use the app
